The risk related to coronavirus is still real and serious. Although some restrictions have been removed in Poland, special rules still apply in the UL dormitories and need to be followed.

Our priority is to ensure the safety for both students and dormitory employees.

Please remember that the following rules apply in the UL dorms:

1. The Dormitory Reception has the right to check every entry and going out of its residents. They will ask you: why you leave the building, where are you going and when will you return. They will also check if you are coming back at the declared time. Each time you must sign in, when you go out and return to the dormitory.

2. A resident may leave the dormitory for one or more nights, provided it has been consulted and agreed with the dormitory manager. In case of lack of agreement and leaving the dormitory despite this, you will lose your place. Your belongings will be packed and put in a safe place.

3. There is no possibility for visits of people from outside or residents from other student dormitories.

4. The dormitory is closed from 11.00 pm. / 23:00.

5. TV rooms and gyms are closed.

6. We remind you to wear masks even when you use the laundry, drying room or go to the reception desk.

7. Only one person can be in the kitchen at the given time.

8. Residents are forbidden to gather in the corridors.

Volition of the above rules will result in the removal from the dormitory. These restrictions are introduced for the safety of both you – students – as well as dormitory administration. If you don’t agree with these rules, please consider another place of residence.

Important! The above procedures were prepared on the basis of the current internal regulations of the University of Lodz, as well as state regulations. In the event of various unforeseen circumstances, decisions previously taken by the University Authorities may change based on the current epidemiological situation at the UL Campus. If the state of the epidemic threat is maintained, the University reserves the right to maintain the above rules in the new academic year.

Procedures implemented in case a resident or dormitory employee is suspected of being infected with coronavirus:

1. The dormitory administration contacts the State Sanitary Inspection in Lodz (SANEPID).

2. The whole floor (or the entire dormitory) where the potential threat of coronavirus occurs will be closed for the period specified by SANEPID, it is usually 14 days.

3. Should this occur, each student will be placed under quarantine and will receive a decision about it from the Sanitary Inspectorate (SANEPID), which means that s/he cannot leave the building or one’s room.

Updated announcements can be found on the website https://covid19.uni.lodz.pl/zarzadzenia-i-komunikaty/

Please follow the announcements on regular basis.
